## **AUTEL INTRODUCES AUTOLINK AL609 (ABS+OBDII diagnostic tool)**

“A great way to get bang for the buck out of just one tool!”

**Shenzhen, China (2013-1-22)** - The new AutoLink AL609 from Autel is a top-of-the-line scan tool that combines OBDII diagnostics with ABS diagnostics to give service technicians the ability to do the “side” work in one tool.

Nowadays, a scan tool has become a necessity for brake work on many late-model vehicles. ABS codes and self-tests require additional software that goes beyond what is needed to read and interact with OBD II system data. On most professional-grade scan tools, ABS software is still offered as an extra-cost, add-on module or upgrade. Or, the ABS software is packaged with a dedicated ABS tester or scan tool.

Now Autel integrates ABS diagnostic capabilities into OBDII code reader, which is handy for reading and clearing ABS & OBD codes. Though targeted primarily to the DIY market, professionals can also use this tool for quick diagnostic checks.

Autel AL609 offers you a more affordable option to handle a broad range of makes and models comparing with the Factory scan tools. We provide coverage on more than 30 domestic, European and Asian models up to model year 2013.
